What We Do

We do it all within the context of a member-focused model:

- > Total drug management (claims processing, utilization management, prior authorization, retail and 340B networks; etc.)
- > Innovative clinical programs
- > NCQA compliant member website
- > Member engagement solutions
- > State-of-the-art technology, reporting and analytics designed to improve outcomes while reducing costs
- > One formulary
- > Comprehensive specialty pharmacy
- > Full-service mail order pharmacy
- > 24/7/365 live customer service staff with licensed pharmacy technicians

The Envolve Pharmacy Solutions Difference

Envolve Pharmacy Solutions provides total drug management that includes integrated pharmacy benefits management, specialty pharmacy and medication delivery services. As a comprehensive traditional and specialty drug management solution, we constantly innovate for our plan sponsor partners, and deliver personal, caring service for members.

Total Pharmacy Benefit Management

We combine the systems, tools and expertise of a traditional PBM with the capabilities and experience of a specialty pharmacy to provide a full spectrum of pharmacy benefit management services that are tailored to each of our plan sponsors.

Flexibility With Innovation

We deliver a flexible, high-touch benefit supported by innovative clinical programs and analytics.

Customization

We offer a variety of options for managing drug spend, rather than a one-size-fits-all approach to benefit needs.

Integration

We are able to integrate care management, costs and outcomes for pharmacy and medical benefit plans.

Visibility

We provide complete visibility into the financial, clinical and operational aspects of pharmacy benefit management and delivery.
