

Comprehensive
PREFERRED DRUG LIST

BRIDGEWAY

Pharmacy Program

Bridgeway Health Solutions is committed to providing appropriate, high quality, and cost effective drug therapy to all Bridgeway Health Solutions members. Bridgeway Health Solutions works with providers and pharmacists to ensure that medications used to treat a variety of conditions and diseases are covered. Bridgeway Health Solutions covers prescription medications and certain over-the-counter (OTC) medications when ordered by an Arizona Medicaid enrolled, Bridgeway Health Solutions practitioner. The pharmacy program does not cover all medications. Some medications require prior authorization (PA) or have limitations on age, dosage, and maximum quantities.

Preferred Drug List

The Bridgeway Health Solutions Preferred Drug List (PDL) is the list of covered drugs. The PDL applies to drugs members can receive at retail pharmacies. The Bridgeway Health Solutions PDL is continually evaluated by the Bridgeway Health Solutions Pharmacy and Therapeutics (P&T) Committee to promote the appropriate and cost-effective use of medications. The Committee is composed of the Bridgeway Health Solutions Medical Director, Bridgeway Health Solutions Pharmacy Director, and several Arizona physicians, pharmacists, and other healthcare professionals. Changes to the drug list must be approved by the P&T Committee.

Pharmacy Benefit Manager

Bridgeway Health Solutions works with US Script to process pharmacy claims for prescribed drugs. Some drugs on the Bridgeway Health Solutions PDL may require PA, US Script is responsible for administering this process. US Script is our Pharmacy Benefit Manager.

Specialty Drugs

Certain medications are only covered when supplied by Bridgeway Health Solutions specialty pharmacy provider. The preferred specialty pharmacy provider of Bridgeway Health Solutions is Acaria Health. All specialty drugs, such as biopharmaceuticals and injectables, require PA to be approved for payment by Bridgeway Health Solutions.

Acaria Health provides the following services:

- Delivers drugs to your home or provider's office
- Provide staff pharmacists who can help you 24 hours a day, seven days a week to answer your questions and offer help with your drugs
- Give you information, materials, and ongoing support to help you take the drugs to appropriately manage your health condition

Dispensing Limits

Most drugs may be dispensed up to a maximum of thirty (30) days supply for each new prescription or refill. Some drugs are also available to be filled up to 90 day supplies. A total of 80% of the days supply must have elapsed before the prescription can be refilled for all drugs.

Appropriate Use and Safety Edits

The health and safety the member is a priority for Bridgeway Health Solutions. One of the ways we address member safety is through point-of sale (POS) edits at the time a prescription is processed at the pharmacy. These edits are based on FDA recommendations and promote safe and effective medication utilization.

Prior Authorizations

Some medications listed on the Bridgeway Health Solutions PDL may require PA. The information should be submitted by the practitioner or pharmacist to US Script on the **Medication Prior Authorization Form**. This form should be **faxed to US Script at 1-866-399-0929**. This document can be found on the Bridgeway Health Solutions website.

Bridgeway Health Solutions will cover the medication if it is determined that:

1. There is a medical reason the member needs the specific medication.
2. Depending on the medication, other medications on the PDL have not worked.

Authorization requests are reviewed by a licensed clinical pharmacist using the criteria approved by the Bridgeway Health Solutions P&T Committee. If the request is approved, US Script notifies the practitioner by fax. If the clinical information provided does not meet the coverage criteria for the requested medication, Bridgeway Health Solutions will notify the member and their practitioner of alternatives and provide information regarding the appeal process.

Step Therapy

Some medications listed on the Bridgeway Health Solutions PDL may require specific medications to be used before the member can receive the step therapy medication. If Bridgeway Health Solutions has a record that the required medication was tried first the step therapy medications are automatically covered. If Bridgeway Health Solutions does not have a record that the required medication was tried, the member's practitioner may be required to provide additional information. If authorization is not granted, Bridgeway Health Solutions will notify the member and their practitioner and provide information regarding the appeal process.

Quantity Limits

Bridgeway Health Solutions may limit how much of a certain medication a member can get at one time. If the practitioner feels the member has a medical reason for getting a greater amount, a PA may be requested. If Bridgeway Health Solutions does not grant PA we will notify the member and their practitioner and provide information regarding the appeal process.

Age Limits

Some medications on the Bridgeway Health Solutions PDL may have age limits. These are set for certain drugs based on FDA approved labeling and for safety concerns and quality standards of care. Age limits align with current FDA alerts for the appropriate use of pharmaceuticals.

Gender Limits

Some medications on the Bridgeway Health Solutions PDL may be limited to one gender. These limits are set for certain drugs based on FDA approved labeling and for safety concerns and quality standards of care. Gender limits align with current FDA alerts for the appropriate use of pharmaceuticals.

Medical Necessity Requests

If the member requires a medication that does not appear on the PDL, the member's practitioner can make a medical necessity (MN) request for the medication. It is anticipated that such exceptions will be rare as the PDL medications are appropriate to treat the vast majority of medical conditions.

For a MN request Bridgeway Health Solutions requires:

- Documentation of failure of at least two PDL agents within the same therapeutic class (provided two agents exist in the therapeutic category with comparable labeled indications) for the same diagnosis (e.g. migraine, neuropathic pain, etc.); or
- Documented intolerance or contraindication to at least two PDL agents within the same therapeutic class (provided two agents exist in the therapeutic category with comparable labeled indications); or
- Documented clinical history or presentation where the patient is not a candidate for any of the PDL agents for the indication.

These requests are reviewed by a licensed clinical pharmacist using the criteria approved by the Bridgeway Health Solutions P&T Committee. If the request is approved, US Script notifies the practitioner by fax. If the clinical information provided does not meet the coverage criteria for the requested medication, Bridgeway Health Solutions will notify the member and their practitioner of alternatives and provide information regarding the appeal process.

72 Hour Emergency Supply Policy

State and Federal law require that a pharmacy dispense a 72 hour (3 day) supply of medication to any member awaiting PA determination. The purpose is to avoid interruption of current therapy or delay in the initiation of therapy. All participating pharmacies are authorized to provide a 72 hour supply of medication and will be reimbursed for the ingredient cost and dispensing fee of the 72 hour supply of medication, whether or not the PA request is ultimately approved or denied. The pharmacy must **call US Script at 1-888-929-3790** for a prescription override to submit the 72 hour medication supply for payment.

Exclusions

The following drug categories are not part of the Bridgeway Health Solutions PDL and are not covered by the 72 hour emergency supply policy:

- Drugs used for weight loss (unless prescribed for an indication other than obesity)
- Anti-Hemophilia Products
- DESI ineffective drugs
- Drugs used to treat infertility
- Experimental/Investigational pharmaceuticals or products

- Erectile dysfunction products prescribed to treat impotence
- Hair growth restorers and other drugs used for cosmetic purposes
- Immunizing agents
- Injectable/Oral drugs administered by the provider in the office, in an outpatient clinic or and infusion center, or in a mental health center
- Prostheses, appliances and devices (except products for Diabetics and products used for contraception)
- Injectable drugs or infusion therapy and supplies (except those listed in the PDL)
- Nutritional supplements
- Oral vitamins and minerals (except those listed in the PDL)
- OTC drugs (except those listed in the PDL)
- Drugs covered under Medicare Part B and/or Medicare Part D

Newly Approved Products

Bridgeway Health Solutions reviews new drugs for safety and effectiveness before adding them to the PDL. During this period, access to these medications will be considered through the PA review process. If Bridgeway Health Solutions does not grant PA we will notify the member and their practitioner and provide information regarding the appeal process.

Over-the-Counter Medications

Bridgeway Health Solutions covers a variety of OTC medications. These medications can be found throughout the Bridgeway Health Solutions PDL. Bridgeway Health Solutions covers OTC products listed in the PDL if the member has a prescription from a licensed practitioner that meets all the legal requirements for a prescription.

Generic Drugs

When generic drugs are available, the brand name drug will not be covered without Bridgeway Health Solutions authorization. Generic drugs have the same active ingredient and work the same as brand name drugs. If the member or their practitioner feels a brand name drug is medically necessary, the practitioner request the drug using the PA process. We will cover the brand-name drug according to our clinical guidelines if there is a medical reason the member needs the particular brand-name drug. If Bridgeway Health Solutions does not grant authorization, we will notify the member and their practitioner and provide information regarding the appeal process.

The provision is waived for the following products due to their narrow therapeutic index (NTI) as recognized by current medical and pharmaceutical literature: Aminophylline, Carbamazepine, Cyclosporine, Digoxin, Disopyramide, Ethosuximide, Flecainide, L-Thyroxine, Lithium, Phenytoin, Procainamide, Theophylline, Thyroid, Valproic Acid, and Warfarin.

Drug Efficacy Study and Implementation Drugs

DESI products and known related drug products are defined as less than effective by the Food and Drug Administration because there is a lack of substantial evidence of effectiveness for all labeling indications and because a compelling justification for their medical need has not been established. DESI products are not covered by Bridgeway Health Solutions.

Filling a Prescription

A member can have prescriptions filled at a Bridgeway Health Solutions network pharmacy. If the member decides to have a prescription filled at a network pharmacy they can locate a pharmacy near them by contacting Bridgeway Health Solutions Member Services. At the pharmacy the member will need to provide the pharmacist with the prescription and their Bridgeway Health Solutions ID card.
