

**Clinical Policy: Selinexor (Xpovio)** 

Reference Number: ERX.SPA.342

Effective Date: 09.01.19 Last Review Date: 08.21

Line of Business: Commercial, Medicaid Revision Log

## See <u>Important Reminder</u> at the end of this policy for important regulatory and legal information.

#### Description

Selinexor (Xpovio®) is a nuclear export inhibitor (XPO1 inhibitor).

## FDA Approved Indication(s)

Xpovio is indicated:

- In combination with bortezomib and dexamethasone for the treatment of adult patients with multiple myeloma who have received at least one prior therapy.
- For the treatment of adult patients with relapsed or refractory multiple myeloma (MM) in combination
  with dexamethasone who have received at least four prior therapies and whose disease is refractory
  to at least two proteasome inhibitors, at least two immunomodulatory agents, and an anti-CD38
  monoclonal antibody.
- For the treatment of adult patients with relapsed or refractory diffuse large B-cell lymphoma (DLBCL), not otherwise specified (NOS), including DLBCL arising from follicular lymphoma, after at least 2 lines of systemic therapy. This indication is approved under accelerated approval based on response rate. Continued approval for this indication may be contingent upon verification and description of clinical benefit in a confirmatory trial.

## Policy/Criteria

Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

Health plan approved formularies should be reviewed for all coverage determinations. Requirements to use preferred alternative agents apply only when such requirements align with the health plan approved formulary.

It is the policy of health plans affiliated with Envolve Pharmacy Solutions™ that Xpovio is **medically necessary** when the following criteria are met:

#### I. Initial Approval Criteria

- A. Multiple Myeloma (must meet all):
  - 1. Diagnosis of MM;
  - 2. Prescribed by or in consultation with an oncologist or hematologist;
  - Age ≥ 18 years;
  - 4. Disease is relapsed, refractory, or progressive;
  - 5. One of the following (a, b, c, or d):\*
    - a. Prescribed in combination with bortezomib and dexamethasone;
    - b. Prescribed in combination with Darzalex® and dexamethasone;
    - c. Prescribed in combination with pomalidomide and dexamethasone and member has received at least two prior therapies including an immunomodulatory agent and a proteasome inhibitor;
    - d. Prescribed in combination with dexamethasone and member has received ≥ 4 prior therapies (see Appendix B) including all of the following (a, b, and c):
      - i. Two proteasome inhibitors (e.g., bortezomib, Kyprolis®, Ninlaro®);
      - ii. Two immunomodulatory agents (e.g., Revlimid®, pomalidomide, Thalomid®);
      - iii. One anti-CD38 monoclonal antibody (e.g., Darzalex<sup>®</sup>);

<sup>\*</sup>Prior authorization may be required for the agents listed above

# CLINICAL POLICY Selinexor

- 6. Request meets one of the following (a or b):\*
  - a. Dose does not exceed one of the following (i or ii):
    - i. Prescribed in combination with bortezomib and dexamethasone: 100 mg (5 tablets) per week;
    - ii. All other combination regimens: 160 mg (8 tablets) per week;
  - b. Dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (*prescriber must submit supporting evidence*).

\*Prescribed regimen must be FDA-approved or recommended by NCCN

## Approval duration:

Commercial - Length of Benefit

Medicaid - 6 months

#### B. Diffuse Large B-Cell Lymphoma (must meet all):

- 1. Diagnosis of DLBCL, NOS, including DLBCL arising from follicular lymphoma;
- 2. Prescribed by or in consultation with an oncologist or hematologist;
- Age ≥ 18 years;
- 4. Disease is relapsed or refractory;
- Member has received ≥ 2 prior therapies\* for relapsed or refractory disease (see Appendix B):

\*Prior authorization may be required

- 6. Request meets one of the following (a or b):\*
  - a. Dose does not exceed 60 mg (3 tablets) twice weekly;
  - b. Dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (*prescriber must submit supporting evidence*).

\*Prescribed regimen must be FDA-approved or recommended by NCCN.

#### Approval duration:

Medicaid - 6 months

Commercial - Length of Benefit

# B. Other diagnoses/indications

1. Refer to ERX.PA.01 if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized).

#### **II.** Continued Therapy

### A. All Indications in Section I (must meet all):

- Currently receiving medication via health plan affiliated with Envolve Pharmacy Solutions, or documentation supports that member is currently receiving Xpovio for a covered indication and has received this medication for at least 30 days;
- 2. Member is responding positively to therapy;
- 3. If request is for a dose increase, request meets one of the following (a, b, or c):\*
  - a. For MM: New dose does not exceed one of the following (i or ii):
    - i. Prescribed in combination with bortezomib and dexamethasone: 100 mg (5 tablets) per week;
    - ii. All other combination regimens: 160 mg (8 tablets) per week;
  - b. For DLBCL: New dose does not exceed 60 mg (3 tablets) twice weekly;
  - c. New dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (*prescriber must submit supporting evidence*).

\*Prescribed regimen must be FDA-approved or recommended by NCCN

#### Approval duration:

Commercial - Length of Benefit

Medicaid - 12 months

#### B. Other diagnoses/indications (must meet 1 or 2):

1. Currently receiving medication via a health plan affiliated with Envolve Pharmacy Solutions and documentation supports positive response to therapy.

Approval duration: Duration of request or 6 months (whichever is less); or

NCCN: National Comprehensive Cancer

Network

2. Refer to ERX.PA.01 if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized).

## III. Diagnoses/Indications for which coverage is NOT authorized:

A. Non-FDA approved indications, which are not addressed in this policy, unless there is sufficient documentation of efficacy and safety according to the off-label use policy - ERX.PA.01 or evidence of coverage.

#### IV. Appendices/General Information

Appendix A: Abbreviation/Acronym Key DLBCL: diffuse large B-cell lymphoma FDA: Food and Drug Administration

MM: multiple myeloma NOS: not otherwise specified

Appendix B: Therapeutic Alternatives

This table provides a listing of preferred alternative therapy recommended in the approval criteria.

The drugs listed here may not be a formulary agent and may require prior authorization.					
Drug Name	Dosing	Dose Limit/			
	Regimen	•			
MM: regimens containing proteasome inhibitors, immunomodulatory agents and/or anti-CD38					
monoclonal antibodies (examples - NCCN)					
bortezomib / Revlimid (lenalidomide) or pomalidomide or	Varies	Varies			
Thalomid (thalidomide) / dexamethasone					
Kyprolis (carfilzomib – weekly or twice weekly) / dexamethasone	Varies	Varies			
Kyprolis / Revlimid / dexamethasone	Varies	Varies			
Ninlaro (ixazomib) / Revlimid / dexamethasone	Varies	Varies			
Darzalex (daratumumab) / bortezomib / dexamethasone ±	Varies	Varies			
Thalomid					
Darzalex / Revlimid / dexamethasone	Varies	Varies			
DLBCL NOS: second-line/subsequent regimens (examples - NCCN)					
GemOx (gemcitabine, oxaliplatin) ± rituximab	Varies	Varies			
Polatuzumab vedotin ± rituximab ± bendamustine	Varies	Varies			
DHAP (dexamethasone, cisplatin, cytarabine) ± rituximab	Varies	Varies			
DHAX (dexamethasone, cytarabine, oxaliplatin) ± rituximab	Varies	Varies			
Yescarta® (axicabtagene ciloleucel)	Varies	Varies			
Kymriah® (tisagenlecleucel)	Varies	Varies			

Therapeutic alternatives are listed as Brand name® (generic) when the drug is available by brand name only and generic (Brand name®) when the drug is available by both brand and generic.

Appendix C: Contraindications/Boxed Warnings None reported

V. Dosage and Administration

zookgo kiik / kiiiiiiiioti kiioii				
Indication	Dosing Regimen	Maximum Dose		
MM	80 mg in combination with dexamethasone PO on days 1 and 3 of each week  100 mg in combination with bortezomib and dexamethasone PO on day 1 of each week	160 mg/week		
DLBCL	60 mg taken PO on Days 1 and 3 of each week	60 mg/daily		

#### **VI. Product Availability**

Tablets: 20 mg, 40 mg, 50 mg, 60 mg
